

Amana Bottom Mount Refrigerator

PRODUCT MODEL NUMBERS

ABB2221FE
AFD2535FE
AFF2534FE

Electrical: A 115-volt, 60-Hz, AC-only 15- or 20-amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

NOTE: Before performing any type of installation, cleaning, or removing a light bulb, turn the refrigerator to OFF. Depending on your model, turn the freezer control to the word OFF, or press the Freezer down arrow touch pad until a dash (–) appears in both the Freezer and Refrigerator displays as shown. Disconnect the refrigerator from the electrical source. When you are finished, reconnect the refrigerator to the electrical source and reset the temperature controls to the desired setting.

Water: A cold water supply with water pressure of between 35 and 120 psi (241 and 827 kPa) is required to operate the water dispenser and ice maker. If you have questions about your water pressure, call a licensed, qualified plumber.

IMPORTANT: The pressure of the water supply coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 35 and 120 psi (241 and 827 kPa).

If a reverse osmosis water filtration system is connected to your cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi (276 to 414 kPa).

PRODUCT DIMENSIONS

Model #	Depth "A" (mm)	Cab. Width "B" (mm)	Cab. Height "C" (mm)	Overall Height "D" (mm)
ABB2221FE	33" (83.8 cm)	32-5/8" (82.9 cm)	68-5/8" (174.3 cm)	69-7/8" (177.5 cm)
AFD2535FE	34" (86.3 cm)	35-5/8" (90.5 cm)	68-5/8" (174.3 cm)	69-7/8" (177.5 cm)

LOCATION REQUIREMENTS

To ensure proper ventilation for your refrigerator, allow for a 1/2" (1.3 cm) space at the top and behind the refrigerator. If your refrigerator has an ice maker, allow extra space at the back for the water line connections. When installing your refrigerator next to a fixed wall, leave 2-1/2" (6.3 cm) minimum on the hinge side (some models require more) to allow for the door to swing open.

NOTE: It is recommended that you do not install the refrigerator near an oven, radiator, or other heat source. Do not install the refrigerator in a location where the temperature will fall below 55°F (13°C).
